# WIDE MENU

# THE APPROPRIATE SOLUTION

for the medium size laboratory

Level sensors and Sample Addition Monitoring (SAM) ensure the accurate pipetting of sample and reagents.

The Identi-System Bar-Code Concept ensures the elimination of human errors in the preanalytical phase.

Report results earlier reducing your turn-around time

Combine any kind of test in the same run

Consolidate your infectious diseases and autoimmunity tests on a single system

Control your costs:  
1 device = 1 test
