

NF800/800R Multi-Purpose Bench Top Centrifuges

NF 800 and NF 800R multi-purpose bench top centrifuges are designed to meet most of the centrifugation requirements in the medical, biology, research and quality control laboratories for medium sized samples.

NF 800/800R offer an excellent price-quality ratio in terms of versatility, performance, ease of use, safety and reliability.

VERSATILITY

• NF 800/800R answers multiple needs in a single instrument with five different rotors

• The swing-out rotor with a maximum capacity of 4x200 ml can accommodate the tubes which are mostly used in the laboratories.

- Microtitre plate rotor with a capacity of 2x3 pcs. plates.
- 30x15 ml angle rotor with choice of different adaptors
- For high speed requirements, two angle rotors with the capacities of 6x50 ml and 24x1,5/2 ml

SAMPLE PROTECTION

• NF 800 ventilated model incorporates CoolRun[™] technology whereby effective air circulation through the air channel in the lid rapidly removes heat from the chamber, keeping temperature rise to an absolute minimum.

• Refrigerated model NF 800R, programmable over a wide range of temperatures between -9°C and +40°C for heat sensitive samples, can sustain +4°C even at maximum speed to protect biologically active samples.

PRECISION

- Programmable microprocessor control system for accurate operations
- Programming option as speed or RCF
- Programmable acceleration and braking in 10 different rates to optimize run time and avoid resuspension

CONVENIENCE

- User friendly control system
- Bright LEDs on near-vertical displays can easily be seen from across the laboratory
- Display of all programmable parameters during operation
- Ten program memories for frequently made applications
- Audible and visual warning at the end of the programQuite and brushless induction motor

SAFETY

• Buckets with transparent hermetically sealed caps to provide protection against pathogenic or hazardous samples in case of tube breakage

• Electronic imbalance detector shuts down the run if an unbalanced load is detected

• Easy to clean and contaminate stainless steel, corrosion-resistant chamber

• Steel barrier ring around the chamber for protection against breakage

• The lid interlock ensures that the lid cannot be opened if the centrifuge is running and a run cannot be started if the lid is not shut correctly. An 'Open' message informs the user.

• Rotor over speed protection to spin the rotor at its maximum allowed speed if wrong program is operated

Motor overheating protection

• Diagnostic system for possible failures.

SWING-OUT ROTORS AND ACCESSORIES
